EXPERIENCE

Strategic Designer, Client Engineering – IBM

New York, New York | Jan 2026 to Present

- Serve as the sole designer on a cross-functional team, owning end-to-end PoC design across 3 enterprise healthcare and government accounts in a B2B SaaS environment, designing and prototyping solutions that advanced 70+ PoCs into sales contracts, partnering with C-suite level stakeholders to close \$23.5M in deals.
- Pioneered the first team workflow connecting Figma's MCP server to an IBM AI-powered IDE assistant, showcasing the integration as a client-facing use case at a 30+ stakeholder Technology Day that contributed to a \$500K SaaS deal, authoring a reusable lab guide for generating code, reading design changes, and editing directly from Figma.
- Owned 0→1 design of a Medical AI Quiz Generator in 4 weeks, from user research through production-ready specs. Interviewed 5 faculty stakeholders, designed 20+ screens across dual student and faculty perspectives, and shipped the AI-integrated platform in partnership with engineers, reducing faculty content creation and evaluation time by 50% (~\$750 saved per 10-hour cycle).
- Designed and shipped a self-service catalog microsite using Figma Make and an AI-powered IDE assistant, helping enterprise clients see which licensed software entitlements they own and aren't using, now scaling the tool across additional market teams.

Innovation Designer, Client Engineering – IBM

New York, New York | 2024 to 2026

- Built a Figma design system for a web business-registration platform powered by IBM agentic AI, enabling designers to build at speed and reducing time to complete complex service searches and forms by 40-60% while increasing successful form completion 2-3x. Led user research and prototyping for an iOS disaster-relief extension, taking greater design ownership across the mobile experience through user interviews and prototyping.

Hardware Product Design Intern – Hudl

Lincoln, Nebraska | May 2022 to Dec 2022

- Shipped iOS redesign of the mobile Focus Flex camera calibration flow, A/B testing two competing design directions with 10 beta users to determine the preferred experience before shipping, iterating with engineers and design leads through high-fidelity wireframes and production-ready specs.

EDUCATION

Purdue University – B.S. in User Experience Design

West Lafayette, Indiana | May 2024 | John Martinson Honors College

SKILLS

Product Design & Research: Accessibility, design systems, prototyping, user research, usability testing, journey mapping, workshop facilitation, A/B testing, agile project management, AI prompt engineering

Tools: v0, Cursor, Figma, Figma Make, Claude Code, Claude Design, HTML/CSS/JS, Webflow, Mural, Monday.com, Loveable

PROJECTS

Skincare Analyzer Webapp

Seeded and designed a personalized skincare compatibility web app from an original concept. Built the product's design system from scratch in Figma, including reusable components with defined states for buttons and form fields, alongside a full brand guide covering color, typography, and visual identity.

Personal Portfolio Website

Designed and deployed enyasong.com independently from concept to production utilizing v0 and Cursor.
